CONTINUATION

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. After the formation of the California Water Commission back on December 19, 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

GENERAL INFORMATION PERTAINING TO WATER RIGHTS

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

Riparian rights enable an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be adjacent to the water source and must never have been severed from the sources of supply by an intervening parcel without the consent of the riparian owners. Generally, a riparian water user must share the water supply with other riparian owners. The flow of a stream but may not be used to store water for later use or divert water which would otherwise flow to the water source. Generally, appropriative rights may be obtained by diverting water from its natural source. Appropriative rights have been required to obtain a permit from the State Water Resources Control Board.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be obtained only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit from the State.

The Water Diversion and Use must be filed by riparian and per 1914 appropriative water users. The filing of a statement enables the State to notify such users if someone proposes a new appropriation upstream from their diversion. If additional water is available for future appropriators.

For more specific information concerning water rights, please contact the Department of Natural Resources, Division of Water Diversion and Use. (2) Inform

An appropriative right enables an owner to divert water from its source to another place outside the same watershed as the water source. The diversion of the riparian right to the severed parcel. Conservation of the riparian right to the natural flow of a stream. Riparian rights may be used to divert the natural flow of groundwater. Different watershed, or return flows from use of groundwater.

A riparian right is required for use of water on nonriparian land and for storage of water. Since 1914, new appropriators have been required to file a statement of water rights with the State Water Resources Control Board. The filing of a statement of water rights is required only when there is a surplus not needed by riparian water users. The filing of a statement of water rights is required only when there is a surplus not needed by riparian water users. The filing of a statement of water rights is required only when there is a surplus not needed by riparian water users.

Statements of Water Diversion and Use must be filed by riparian and per 1914 appropriate water users. The filing of a statement of water rights is required only when there is a surplus not needed by riparian water users. The filing of a statement of water rights is required only when there is a surplus not needed by riparian water users. The filing of a statement of water rights is required only when there is a surplus not needed by riparian water users.

(3) assists the State to determine if additional water is available for future appropriators.

For more specific information concerning water rights, please contact the Department of Water Resources, Division of Water Rights, at the following address:

Department of Water Resources
Division of Water Rights
1001 L Street, N.E.
Washington, D.C. 20002

The following pamphlets are available:

(1) Statements of Water Diversion and Use, (2) Information on the Appropriation of Water in California.

The above discussion is provided for general information. For more specific information concerning water rights, please contact the State Water Resources Control Board, 1001 North First Street, Sacramento, California 95833. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information on Water Rights in California, and (3) Appropriation of Water in California.

COMPLETE AND RETURN THIS FORM BY JULY 1, 1994.

- A. Water is used under: Riparian claim _____; Pre 1914 right ☒ _____; Other (explain) _____
- B. Year of first use (Please provide if missing above) _____
- C. Amount of Use - Enter the amount of water used each month. If monthly and annual use are not known, check the months in which water was used.

Amounts below are: ☐ Gallons ☒ Acre-feet ☐ (other) _____

	JAN.	FEB.	MAR.	APR.	MAY	JUNE	JULY	AUG.	SEPT.	OCT.	NOV.	DEC.	TOTAL ANNUAL
1991	3	1	7	17	9	2	1	0	0	3	6	6	55
1992	5	9	10	21	14	14	8	8	7	10	13	17	126
1993	20	19	63	87	75	52	36	31	25	30	34	31	503

- D. Purpose of Use - Specify number of acres irrigated, stock watered, persons served, etc.
Irrigation _____ acres; Stockwatering _____; Domestic _____
Other (specify) _____

- E. Changes in Method of Diversion - Describe any changes in your project since your previous statement was filed. (New pump, enlarged diversion dam, location of diversion, etc.)

- F. If part of the water listed in Part C consists of reclaimed or polluted water, please indicate the annual amounts of reclaimed or polluted water in the space below.

I declare under penalty of perjury that the information in this report is true to the best of my knowledge and belief.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriate right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

STATEMENT OF WATER DIVERSION AND USE

L.A. 116

This statement should be typewritten or legibly written in ink.

S 1754

A. Name of person diverting water CITY OF LOS ANGELES
Address BOX 111, LOS ANGELES, CALIF. 90054

B. Name of body of water at point of diversion Thibaut Creek
Tributary to Owens River

C. Place of diversion NE 1/4 SW 1/4 Section 27, Township 12S, Range 34E, MD 344,
Inyo County, or locate it on sketch of section grid on reverse side with regard to section lines or
prominent local landmarks.

D. Name of works Thibaut Creek Intake to Pipe Line

E. Capacity of diversion works 2⁺
Capacity of storage reservoir _____
State quantity of water used each month in gallons or acre-feet

Year	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Total Annual
1966	30	22	25	22	14	9	4	3	5	9	13	22	178

If monthly and annual use are not known, check months in which water was used and extent of use in units, such as
acres of each crop irrigated, average number of persons served, number of stock fed, etc. _____

Maximum annual water use in recent years 333 gallons
Minimum annual water use in recent years 136 acre-feet
Type of diversion facility: gravity ☒ pump _____
Method of measurement: weir 90°V, flume 1' Vent., electric power meter _____, water meter _____, estimate _____

F. Purpose of use (what water is being used for) Irrigation and stockwatering.

G. General description or location of place of use (use sketch of section grid on reverse side if you desire) In part of
Sec. 26, T12S, R34E, M066N

H. Year of first use as nearly as known 1876

I. Name of person filing statement John G. Cowan
Position Chief Engineer of Water Works and Assistant Manager Organization Department of Water and Power
Address Box 111, Los Angeles, California 90054

I certify that the foregoing statements are true and correct to the best of my knowledge and belief.

Date signed June 22, 1967

Signature John G. Cowan
